

# ARTOA16

**ACCENT** 

7.5W (640lm) | 12V | SORAA, LED Lamp, Halogen

#### **Materials**

6061-T6 Machined aluminum 316 stainless steel hardware

#### **Fitting**

1/2"-14 NPS male thread

#### **Dimming**

MLV / ELV

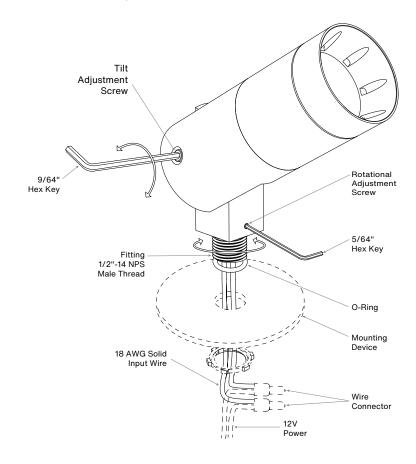

## **Installation and Adjustment**

#### TURN OFF POWER BEFORE AND DURING WIRING TO POWER SUPPLY

Installation/Service must be done by a qualified electrician, and compliant with NEC and Local Codes.

- 1 Secure the fixture fitting to the 1/2"-14 NPS female thread on mounting device (plate, box, spike, etc.).
- 2 Connect 18 AWG solid input wires to the 12V power source using appropriate wire connectors.
- 3 Secure the mounting device with the fixture to mounting surface. For HK original mounting accessory, see the individual instruction for further detail of the installation.
- To adjust tilting position of fixture, loosen tilt adjustment screw with 9/64" hex key, aim the fixture body and tighten the screw to secure the fixture in place. Do not tighten more than necessary.
- 5 To adjust rotating position of the fixture, loosen rotation adjustment screw with 5/64" hex key, aim the fixture stem and tighten the screw to secure the fixture in place. Do not tighten more than necessary.

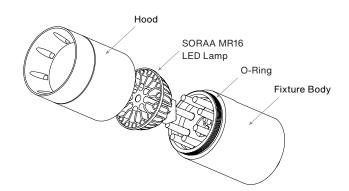

# **Lamp and Reflector Replacement**

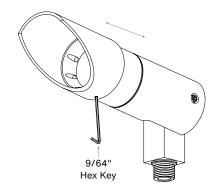

## TURN OFF POWER AND KEEP FIXTURE COOL DURING MAINTENANCE SERVICE

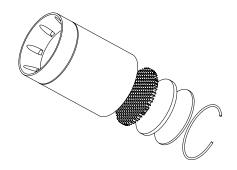

- 1 Rotate threaded hood counter-clockwise to remove it from fixture body and access the lamp assembly.
- 2 Remove existing MR16 Lamp by pulling it straight out from the lamp base. Do not rotate, as it will damage lamp pins.
- 3 Align replacement lamp pins (also ensure alignment of SORAA Lamp structure if appropriate) with GU5.3 bi-pin socket.
- 4 Press down firmly on the lamp to ensure the lamp pins (and SORAA Thermobuster pins as appropriate) are in full contact.
- 5 Thread fixture hood onto the fixture body and rotate clockwise. Ensure the O-ring is in the proper groove on the fixture body to maintain fixture watertight seal.

# **Glare Shield Adjustment & Optical Accessory Setting**

## **Glare Shield Setting For A&B Hood**

- 1 Use the 9/64" hex key to loosen the set screw (8-32 UNC set screw) on the bottom of the glare shield, making sure the screw is not protruding inside the glare shield.
- 2 Slide the glare shield to the desired position, and tighten the set screw. ( \(\hat{\Lambda}\) do not overtighten).

## For Optical Accessory Setting

- Rotate threaded hood counter-clockwise and remove it from fixture body.
- The hood accepts up to 3 accessory optics (hexcel louver, optical lenses, etc.), which are secured in place with metal snap ring.
- 3 Pull out the snap ring from inside the hood.
- 4 Install or replace the optic accessory by placing it into the hood, against the lens.
- 5 Replace the snap ring into the hood and push it into the groove on the inside of the hood that holds the single or multiple accessories best.
- 6 Thread fixture hood onto the fixture body and rotate clockwise. Ensure the O-ring is in the proper groove on the fixture body to maintain fixture watertight seal.
